

Animal Carpets

Animal Carpets - Cow Carpet - Horse Carpets

Benefits:

According to published reports in Pennsylvania “Mud creates an unhealthy environment for horse & livestock.” Mud is pervasive and expensive problem facing dairy and beef producers as well as horse farms. Master Gardner’s Animal Carpet is the solution!

Mud robs beef and dairy producers in the winter and spring and can be avoided by constructing an all-weather surface of animal carpet rock, another carpet layer and a fine surface of choice.

- Step #1** Remove soil including Level and slope soil and roll out MG’s Animal Carpet, overlapping by 12” & securing with PRO-Pins™.
- Step #2** Install aggregate and cover with MG’s Animal Carpet, This relief area is typical an aggregate encased by the ‘Carpet’ insuring the separation of the soil and the aggregate; and the aggregate and sand/mulch base.
